

# API BANKING

## Connect your banking services simply and securely.

### What is an API

APIs (Application Programming Interfaces) are programs that act as the interfaces between applications.

### How APIs work

 Best-in-class client support, by phone or by visiting your local banker.

### API Developer Portal

- Banc of California API library available for direct integrations and usage information.
- Available information includes API specifications, user guides and code samples.
- Immediate access to technical information that changes as APIs are updated.
- Real-time connection to new APIs as we release them.

### Available direct APIs

- Balances
- Internal transfers
- Stop payments
- Transactions and wires

### Next steps

1. Visit [developer.bancofcal.com](https://developer.bancofcal.com).
2. Click Create Account.
3. Fill out the brief inquiry form and click Submit.
4. Receive email with your login credentials.
5. Return to log in: [developer.bancofcal.com](https://developer.bancofcal.com).
6. Reach out to your relationship manager to begin an API integration.
